Reports and Announcements (regular agenda items)

Student Reports: In Core 4, they finished reading *The Giver* and are writing an essay on it. It is a commentary on how the higher power controls society without them knowing it. In Science, they are doing sand crab data analysis with Heal the Bay scientists. They had their first math test reviewing last year's concepts. In Core 3, we are reading *Fish In A Tree* and making our own family trees. We are also learning about the Gold Rush. They went to the Autry Museum today. They had their first math test reviewing factors.

Community Organization Reports (to include but not limited to the following):

PTSA: 17-18 budget adjustments were shared at today's meeting including credit card transaction fees. Focus is on supporting instruction and building community and not as much fundraising pressures. There was a discussion about all the District resources allocated to sites that Ed Foundation and PTSA then boost.

Student Council: Updated Community Groups are created to make sure all new students have a group. First Community Group Morning Meeting (CGMM) is this Friday. They want to plan Spirit Days next that correlate with CGMM days.

Old Business: none

New Business:

Unanimous vote to approve Malaika Boyer as Site Council Chairwoman.

Made two data edits to include the number of participants who took a test. Voted upon final approval for site plan 3 goals and related budget expenditures (see below).

SPSA Executive Summary: In order for all students to be ready for college and careers, we are focusing on engaging in argument with evidence across all content areas in a written format. We want to see the following elements from staff during their own Friday banked time writing inquiry and from students' in-class writing: reasoning,

justification, evidence, connections, research citations, building upon the ideas of others, readability to the audience, clear and coherent/precise academic language.

In order for English Learners to become proficient in English while engaging in a rigorous, standards-aligned curriculum in the core content areas, culturally and linguistically diverse students will receive writing conferences with teachers that frontload Writing Workshop teaching points and offer additional personalized writing instruction.

In order for all students to engage in schools that are safe, well maintained and family friendly, students will learn and demonstrate Mindfulness Strategies within our Social-Emotional Curriculum to build focus/attention, emotional self-regulation, Growth Mindset, relationships and communication skills.
